

# BTL India

BTL India is looking for an experienced Project Manager (8 to 12 yrs.) for its R&D Improvement & Support (I&S) team. The Project Manager will be working with I&S Team Manager and should be able independently handle the assigned projects, ensuring effective time bound effective solutions.

## **ROLES AND RESPONSIBILITIES**

As part of the R&D I&S team, the individual should be able to perform following duties:

- Ownership to execute the assigned project, overseeing & managing cross functional interdependencies.
- Understand the project at a system level & work with the HW/Mech & Software engineers to execute the project.
- Manage & Carry out engineering design change activities by working in close coordination with engineers & cross functional teams of QA, RA, certification agencies Production & Service.
- Keep a watch on components obsolescence & provide timely solutions to prevent production stop situations.
- Collaborate with Production & engineering to investigate product failures & provide solutions for the same.
- Timeline planning considering risks & critical path to ensure no production stop.
- Owning the Technology know-how transfer from released projects.
- Continuous Improvement of Released products w.r.t updated Regulatory Standards.
- Maintain a database of HW & Mech Design reports & be familiar with critical functions.
- Support Production Technologist with Production transfer from one site to another.
- Support Regulatory department with Country Registrations.
- Supports Quality and Regulatory audits as needed.

## **ESSENTIAL QUALIFICATION AND EXPERIENCE**

### **QUALIFICATION:**

- Engineering degree or above in Electrical/Electronics.

### **TECHNICAL COMPETENCY:**

- 7+ years in Embedded Device Product development in the capacity of designer or Tech lead, with Minimum 1+ years of technical/ Project management experience.
- Hands on Expertise in Hardware design with good exposure to other domains (mechanical and software) high level design, development & verification principles.
- Exposure to product safety testing & certification (Ex: CB Certification of medical devices).
- Exposure to value engineering of products w.r.t cost & technology.
- Able to work independently & Experience working with cross functional teams (Engineering, Certification agencies, QA/RA, Production, Sourcing, Suppliers)

### **BEHAVIOURAL COMPETENCY:**

- Excellent Analytical and problem-solving skills.
- Self-motivated and passion to finish (fire in belly).
- Flexible, hands-on and willing to learn new technologies.
- Good team player with good collaboration skills.

### **ADDITIONAL QUALIFICATION AND EXPERIENCE**

- Exposure to Medical devices product development will be an added advantage.
- Exposure to Medical devices standards/regulations, Design controls or similar regulatory environment and QMS will be an added advantage.

BTL INDIA

BTL is a global leader in the field of development and production of medical devices for physiotherapy and is a well-respected company within the field of cardiology and aesthetics with a constantly growing share of the worldwide market. We have four R&D centers (3 in Europe & 1 in India) and two production facilities in Europe where our broad product portfolio is produced from which it is distributed under the BTL brand name to more than 100 branches and business partners around the world. From its establishment in 1993 the company has been building up a complex technological know-how across a wide spectrum of fields. The philosophy of the company is to create technologically unique products with high added value, top quality and original industrial design.
